TITLE : VEHICLE MANAGEMENT SYSTEM,
VEHICLE INFORMATION TERMINAL
USED IN THE SYSTEM, PERSONAL ID
CARD AND VEHICLE MANAGEMENT
METHOD

ABSTRACT : PROBLEM TO BE SOLVED: To smoothly perform maintenance and management for a vehicle by improving the security function of a vehicle and effectively preventing a theft of a vehicle.

SOLUTION: This vehicle management system 70 has a management computer 71 carried on a vehicle VE, a vehicle information terminal 77 connected to the computer 71 to be communicable in the cabin, and a personal ID card 47 provided to be put in and out to the vehicle information terminal 77. An under carriage number, a manufacturing date, an owner ID, a driving enabling person ID, a vehicle inherent ID such as maintenance information are recorded in the management computer 71. The personal ID card 47 is provided with a personal collating function and a vehicle key function such as an engine key, a door key and the like. The vehicle information terminal 77 is removable provided on the vehicle VE.
